

# **National Occupational Skill Standard (NOSS)**

**Occupational Title** : Plumber  
**Level** : 2  
**Sector** : Construction  
**Sub - Sector** : Sanitary Service  
**NOSS ID/NSCO ID** :  
**ISCO NO** :

Council for Technical Education and Vocational Training  
**NATIONAL SKILL TESTING BOARD**

Madhyapur Thimi-17, Sanothimi, Bhaktapur, Nepal

Revised: 23-02-2021 (11-11-2077)

The National Skill Standard and Test was developed by :

1.	Mr. Narayan Dutta Sharma	Adviser	Director General Department of Road
2.	Mr Bhim Raj Thapa	Co-ordinator	Deputy Director General Department of Road
3.	Mr Chhatra Bir Bajracharya	Member Secretary	Technical Officer, STD
4.	Mr Rajesh Prasad	Member	General Manager (Mech. Engineer) Balaju Yantrashala Sanitary Engineering Limited, Balaju
5.	Mr Puspa Das Mulmia	Member	Civil Engineer (Lecturer,IOE) M. & S. Consultant
6.	Mr Hari Govida Maharjan	Member	Asst. Engineer Water supply and sewerage corp. Lalitpur division
7.	Mr. Mohan Shrestha	Member	Plumbing Workshop Incharge IOE, Pulchowk
8.	Mr. Hari Nhuchhe Narayan Maharjan	Member	Dept.Head, Sanitary Dept. B.T.T.C, Balaju

Approved by the tripartite National Skill Testing Board.

5	<b>Unit No: 1</b> <b>Unit Title: Install household water supply and drainage system.</b>	<b>Unit code:</b>
	<b>Elements of competency</b>	<b>Performance standards</b>
	1.1 Prepare tools, equipment and materials	1.1.1 <b>Personal protective equipment (PPE)</b> used in accordance with task requirement. 1.1.2 Tools and equipment collected and checked for working condition in accordance with task requirement. 1.1.3 Materials collected and prepared in accordance with task requirements.
	1.2 Prepare estimate	1.2.1 Quantity of work determined as per drawing and site condition and recorded. 1.2.2 Working hour estimated based on quantity and nature of work. 1.2.3 Cost of labour and materials determined based on quantity and nature of work.
	1.3 Prepare pipes and surface for laying	1.3.1 Scaffold firmly erected and fixed at correct location to withstand load of materials as well as two persons. 1.3.2 Size of <b>pipes</b> selected as per drawing and clearly marked to dimension. 1.3.3 Pipes straightly cut along with marked line. 1.3.4 Thread prepared on GI pipe to <b>standard thread length</b> without damage. 1.3.5 Anti-rust paint uniformly applied on GI pipes. 1.3.6 <b>Pipe jointing</b> performed as per task requirement. 1.3.7 Wall and floor clearly marked for openings as per drawing. 1.3.8 Wall and floor cut along the marked line with <b>required tolerance</b> in plumb and level. 1.3.9 Building drain excavated to the required size as per drawings.
	1.4 Install pipes, sanitary fittings and fixtures	1.4.1 Hot and cold pipes separately laid along with cut portion within plumb and level. 1.4.2 Pipes and <b>pipe fittings</b> joined to the specified dimension within tolerance $\pm 2$ mm in center-to-center dimension. 1.4.3 <b>Valve</b> installed and aligned without surface damage.

		<p>1.4.4 Pipes aligned and clamped on wall and floor.</p> <p>1.4.5 Hot water pipe covered with insulating materials.</p> <p>1.4.6 <b>Sanitary fittings and fixtures</b> assembled, installed and connected as per diagram in line and level without leakage and damage.</p> <p>1.4.7 Installation of pipes, sanitary fittings and fixtures inspected for <b>common defects</b> and rectified.</p>
	1.5 Install waste and soil water system	<p>1.5.1 Pipes and pipe fittings laid along building drain maintaining slope up-to 3% of pipe length.</p> <p>1.5.2 Pipes joined without leakage and damage.</p> <p>1.5.3 Water leakage checked and rectified.</p> <p>1.5.4 Building drain filled with compaction at specified layer and surface levelled.</p> <p>1.5.5 Building drainage pipe lines connected to <b>building drain</b>.</p>
	1.6 Install roof tank	<p>1.6.1 Roof tank placed in designated location within level.</p> <p>1.6.2 Outlet hole drilled 50-60mm above tank base to center of outlet.</p> <p>1.6.3 Inlet hole drilled as per pipe diameter below 50-60mm from top of tank</p> <p>1.6.4 Inlet and outlet pipe joined without leakage.</p> <p>1.6.5 Pipe fittings and valve installed on inlet, outlet and overflow pipe.</p> <p>1.6.6 Overflow pipe installed below 50-60mm from inlet.</p> <p>1.6.7 Air vent pipe joined on outlet water stack vertically extended above top level of water tank.</p> <p>1.6.8 Washout installed at the bottom of water tank.</p>
	1.7 Install water pump	<p>1.7.1 Working condition of water pump checked and placed in designated location within level.</p> <p>1.7.2 Suction pipe equal to pump inlet diameter installed 50-60mm above base of water tank</p>

		<p>maintaining shortest distance without leakage.</p> <p>1.7.3 Delivery pipe equal to pump outlet diameter installed and connected with roof tank supply pipe without leakage.</p> <p>1.7.4 Water pump tested for functioning.</p>
	1.8 Clean work area	<p>1.8.1 Tools and equipment cleaned, maintained, stored and record maintained.</p> <p>1.8.2 Work area cleaned and waste disposed in accordance with <b>3R's principle</b>.</p>
6	<p><b>Task Performance Requirements (Tools, Equipment and Materials):</b></p> <ul style="list-style-type: none"> <li>Measuring tape, pen, paper, pencil, sharpener, eraser, calculator, register, ruler, chalk, marker, scissors, try square, water level, spirit level, plumb bob, mason square, mason string, mason pan, clamp, scaffolding materials, rope, saddle, hammer, shovel, pick, wall cutter, bucket, basket, brush, broom, dust pan, bench vice, chain/pipe vice, hack saw, wooden saw, angle cutting saw, pipe cutter, files, pipe reamer, oil can, knife, pipe wrench, adjustable wrench, chamfering tools, HDPE heating plate, Teflon cloth, thermochrome chalk, thread seal tape, hemp/jute, PPR heating machine, solvent cement, CPVC glue, silicon, chisel, screw drivers, pliers, allen key, threading tool, anti-corrosion coating, pipe bender, mortar board, mason trowel, mason hammer, claw hammer, stock and die, electro fusion machine, wheelbarrow, pressure test pump, portable power/hand drill machine, pipes, valve, fittings, fixtures, water tank, water pump, water meter, cloth, putty, brick, cement, sand, aggregates, nails, screw, grip, step ladder and Personal protective equipment (PPE).</li> </ul>	

7

**Safety and Hygiene (Occupational Health and Safety):**

- Use personal protective equipment.
- Safe handling of materials, tools and equipment.
- Hazards involved in lifting tools, equipment and materials.
- Safe handling of debris.
- Hazards involved in handling cement.
- Hazards involved in sharp objects.
- Hazards involved due to short circuit and electricity.
- Hazards involved due to slippery floors.

5	<b>Unit No: 2</b> <b>Unit Title: Install public water pipelines.</b>	<b>Unit code:</b>
	<b>Elements of competency</b>	<b>Performance standards</b>
	2.1 Prepare tools, equipment and materials	2.1.1 <b>Personal protective equipment (PPE)</b> used in accordance with task requirement. 2.1.2 Tools and equipment collected and checked for working condition in accordance with task requirement. 2.1.3 Materials collected and prepared in accordance with task requirements.
	2.2 Prepare estimate	2.2.1 Worksite visited and <b>required information</b> collected. 2.2.2 Quantity of work determined and recorded. 2.2.3 Working hour estimated based on quantity and nature of work. 2.2.4 Cost of labour and materials determined based on quantity and nature of work.
	2.3 Prepare pipes	2.3.1 Size of <b>pipes</b> selected as per drawing and clearly marked to dimension. 2.3.2 Pipes straightly cut along with marked line. 2.3.3 Thread prepared on GI pipe to <b>standard thread length</b> without damage. 2.3.4 Anti-rust paint uniformly applied on GI pipes. 2.3.5 <b>Pipe jointing</b> performed as per task requirement.
	2.4 Install pipe fittings	2.4.1 Pipe, <b>pipe fittings</b> and gasket checked for damage. 2.4.2 Insertion portion marked on pipe edge. 2.4.3 Lubricants evenly applied on gasket and pipe. 2.4.4 Gasket placed into CI/DI hub and checked for fitting defects. 2.4.5 Pipe inserted up to marking line into hub. 2.4.6 Pipe and pipe fittings joined without surface damage. 2.4.7 Seam formed as per HDPE pipe wall thickness with seam tolerance of +2 mm on joint part. 2.4.8 Leakage checked.

	2.5 Lay pipes	2.5.1 Trench and bedding size checked as per drawing and maintained. 2.5.2 Pipe and fittings cleaned and checked for damage. 2.5.3 Pipes laid on trench within level for distribution line. 2.5.4 Pipes joined to the specified dimension within tolerance $\pm 5$ mm in center-to-center dimension without leakage. 2.5.5 Installation of pipes inspected for <b>common defects</b> and rectified.
	2.6 Install water meter	2.6.1 Physical condition of water meter checked and placed in visible/readable location. 2.6.2 Valve installed on service pipe prior to water meter. 2.6.3 Water meter installed along water flow direction. 2.6.4 Pipes and pipe fittings installed without leakage.
	2.7 Clean work area	2.7.1 Tools and equipment cleaned, checked for faults, maintained and stored. 2.7.2 Work area cleaned and waste disposed in accordance with <b>3R's principle</b> .
6	<p><b>Task Performance Requirements (Tools, Equipment and Materials):</b></p> <ul style="list-style-type: none"> <li>Measuring tape, pen, paper, pencil, sharpener, eraser, calculator, register, ruler, chalk, marker, scissors, try square, water level, spirit level, mason pan, clamp, rope, saddle, hammer, shovel, pick, bucket (<i>Thunchhe</i>), basket, brush, broom, dust pan, chain/pipe vice, hack saw, wooden saw, angle cutting saw, pipe cutter, files, pipe reamer, oil can, knife, chain pipe wrench, adjustable wrench, chamfering tools, HDPE heating plate, Teflon cloth, thermochrome chalk, thread seal tape, anti-corrosion coating, hemp/jute, PPR heating machine, solvent cement, chisel, screw drivers, pliers, allen key, threading tool, caulking tool, pipe bender, mortar board, mason trowel, mason hammer, claw hammer, stock and die, wheelbarrow, electro fusion machine, pressure test pump, pipes, valve, fittings, drum, water pump, water meter, cloth, brick, cement, sand, aggregates and Personal protective equipment (PPE).</li> </ul>	

7

**Safety and Hygiene (Occupational Health and Safety):**

- Use personal protective equipment.
- Safe handling of materials, tools and equipment.
- Hazards involved in lifting tools, equipment and materials.
- Safe handling of debris.
- Hazards involved in handling clay, sand and cement.
- Hazards involved in sharp objects.
- Hazards involved due to short circuit and electricity.
- Hazards involved due to slippery floors.

9	<b>Assessment of Competency</b>					
<b>Unit: 2</b> <b>Unit Title: Install public water supply pipelines</b>	<b>Candidate Details</b>		<b>Assessors Detail</b>			
	Candidate's Name: Registration Number: Symbol No: Test Centre:		Assessors' Name 1. 2. 3.		ID/License No:	
	Test Date:					
	Element of competency	Performance Standards		Standard Met	Standard Not Met	Evidence Type
2.1 Prepare tools, equipment and materials	2.1.1 <b>Personal protective equipment (PPE)</b> used in accordance with task requirement. 2.1.2 Tools and equipment collected and checked for working condition in accordance with task requirement. 2.1.3 Materials collected and prepared in accordance with task requirements.					
2.2 Prepare estimate	2.2.1 Worksite visited and <b>required information</b> collected. 2.2.2 Quantity of work determined and recorded. 2.2.3 Working hour estimated based on quantity and nature of work. 2.2.4 Cost of labour and materials determined based on quantity and nature of work.					
2.3 Prepare pipes	2.3.1 Size of <b>pipes</b> selected as per drawing and clearly marked to					

	<p>dimension.</p> <p>2.3.2 Pipes straightly cut along with marked line.</p> <p>2.3.3 Thread prepared on GI pipe to <b>standard thread length</b> without damage.</p> <p>2.3.4 Anti-rust paint uniformly applied on GI pipes.</p> <p>2.3.5 <b>Pipe jointing</b> performed as per task requirement.</p>			
2.4 Install pipe fittings	<p>2.4.1 Pipe, <b>pipe fittings</b> and gasket checked for damage.</p> <p>2.4.2 Insertion portion marked on pipe edge.</p> <p>2.4.3 Lubricants evenly applied on gasket and pipe.</p> <p>2.4.4 Gasket placed into CI/DI hub and checked for fitting defects.</p> <p>2.4.5 Pipe inserted up to marking line into hub.</p> <p>2.4.6 Pipe and pipe fittings joined without surface damage.</p> <p>2.4.7 Seam formed as per HDPE pipe wall thickness with seam tolerance of +2 mm on joint part.</p> <p>2.4.8 Leakage checked.</p>			
2.5 Lay pipes	<p>2.5.1 Trench and bedding size checked as per drawing and maintained.</p> <p>2.5.2 Pipe and fittings cleaned and checked for damage.</p> <p>2.5.3 Pipes laid on trench within level for distribution line.</p> <p>2.5.4 Pipes joined to the specified dimension within tolerance <math>\pm</math> 5 mm in center-to-center dimension without leakage.</p> <p>2.5.5 Installation of pipes inspected for <b>common defects</b> and rectified.</p>			

2.6 Install water meter	2.6.1 Physical condition of water meter checked and placed in visible/readable location. 2.6.2 Valve installed on service pipe prior to water meter. 2.6.3 Water meter installed along water flow direction. 2.6.4 Pipes and pipe fittings installed without leakage.				
2.7 Clean work area	2.7.1 Tools and equipment cleaned, checked for faults, maintained and stored. 2.7.1 Work area cleaned and waste disposed in accordance with <b>3R's principle.</b>				

**WT**- Written Test

**OQ**- Oral Question

**PT**- Practical Test

**DO** – Direct Observation

**SR**- Supervisor's report

**SN**–Simulation

**RP**- Role Play

**PG** –Photographs

**VD**- Video

**CT** – Certificates

**TS** – Testimonials (Reward)

**PP** – Product Produced

**CS** – Case Study

## Range Statement

Variable	Range
Personal Protective Equipment	<p><i>May include but not limited to:</i></p> <ul style="list-style-type: none"> <li>• Helmet</li> <li>• Apron/Safety Jacket</li> <li>• Goggles</li> <li>• Gloves</li> <li>• Protective shoes</li> <li>• Mask</li> <li>• Safety belt</li> <li>• Ear plug</li> </ul>
Required information	<p><i>May include but not limited to:</i></p> <ul style="list-style-type: none"> <li>• Site condition</li> <li>• Distance</li> <li>• Alignment</li> </ul>
Pipes	<p><i>May include but not limited to:</i></p> <ul style="list-style-type: none"> <li>• Galvanised Iron (GI) pipe</li> <li>• Ductile Iron (DI) pipe</li> <li>• Cast Iron (CI) pipe</li> <li>• High Density Polyethylene (HDPE) pipe</li> <li>• Polyvinyl Chloride (PVC) pipe</li> </ul>

Standard thread length	<p><i>May include but not limited to:</i></p> <table> <thead> <tr> <th><b>Diameter of Pipe (Inch)</b></th><th><b>Thread Length (mm)</b></th></tr> </thead> <tbody> <tr> <td>• <math>\frac{1}{2}</math></td><td>13</td></tr> <tr> <td>• <math>\frac{3}{4}</math></td><td>15</td></tr> <tr> <td>• 1</td><td>17</td></tr> <tr> <td>• <math>1\frac{1}{4}</math></td><td>19</td></tr> <tr> <td>• <math>1\frac{1}{2}</math></td><td>19</td></tr> <tr> <td>• 2</td><td>24</td></tr> </tbody> </table>	<b>Diameter of Pipe (Inch)</b>	<b>Thread Length (mm)</b>	• $\frac{1}{2}$	13	• $\frac{3}{4}$	15	• 1	17	• $1\frac{1}{4}$	19	• $1\frac{1}{2}$	19	• 2	24
